## At The Center of Progress for Care

BioReference provides comprehensive laboratory testing services to aid healthcare providers in the detection, diagnosis, evaluation, monitoring and treatment of diseases. For over 20 years, BioReference has been a trusted laboratory partner for federally qualified health centers and continues its guiding vision of providing high quality, affordable testing to all patients.

## Meeting All of Your Laboratory Needs

- Expansive test menu
- EMR connectivity solutions
- Population management tools
- Patient education
- Services for diverse communities
- Affordable testing

## Full-service Lab Offerings

## Serving Local Neighborhoods

### DIVERSE COMMUNITIES

Patient engagement is the key to building healthier communities. BioReference strives to provide excellent service to patients in a way that makes them feel comfortable. We provide patients with educational materials in their native language and offer a multi-lingual customer service team to answer any questions they may have.

### HEALTH LITERACY

BioReference is proud to offer a secure, HIPAA-compliant patient portal with easy-to-understand test results and educational resources. We encourage patients to become active participants in their health by identifying important trends in their health that they can discuss with their healthcare provider.

### AFFORDABLE TESTING

As a leading provider in diagnostic testing, BioReference is contracted as an in-network provider with most government and private insurance carriers. We also offer payment plan options, a financial assistance program for eligible patients, and self-pay prices for patients without insurance. Our online billing portal allows patients to easily manage their payments and our friendly customer service team is here to help patients understand their financial responsibility.

## Connectivity and Analytics Solutions

The value of connectivity and laboratory analytics is immeasurable in population health. BioReference offers connectivity solutions that close the gap between data and diagnosis.

### Cloud-based Ordering and Reporting

- Streamline office workflow using a simple online ordering system that can integrate with EMRs or practice management systems
- View patient results easily and promptly from any device, anywhere with cloud-based technology
- Keep pulse on practice information and manage at-risk patients through Global CareIndex

### Advanced Laboratory Analytics

- Help ensure consistent care across your network with the ability to generate, compare and analyze laboratory results from patients tested at multiple locations
- Manage the frequency of office visits for sick and at-risk patients utilizing detailed patient reports that include past abnormal results
- Evaluate patients with the potential for developing multiple chronic diseases and track progression across multiple conditions with cumulative reports

### Comprehensive Population Health Management

- Help ensure that the practice is meeting standards through real-time care-coordination monitoring on quality and performance metrics
- Increase patient engagement with integrated 360° telemedicine solution
- Optimize revenue by easily identifying suspect and outstanding codes

### Featured Testing

BioReference offers the BioFire® FilmArray® to test for 21 respiratory viral and bacterial pathogens. These pathogens often present with similar symptoms, so rapid diagnosis can help significantly reduce healthcare costs.
