

PANDEMIC PLAYBOOK

When the COVID-19 pandemic hit, BioReference jumped into action to help ensure patients and healthcare providers would get access to the tests they needed. Through increased testing capacities and nationwide drive-through collection sites, BioReference was able to help people safely navigate their communities with the answers they needed.

BioReference's pandemic response did not stop there: leveraging our innovative and scalable testing solutions, BioReference helped to bring sports back safely, when entertainment was otherwise at a standstill. By building customized solutions, BioReference has become a laboratory of choice for all major professional sport leagues in the U.S.
